

CSCC01 2025S

BURNDOWN REPORT

TEAM NAME – MICROSOFTIES

Date - July 16th, 2025 - July 20th, 2025

SPRINT VELOCITY VS PREVIOUS SPRINT:

- The sprint velocity for Sprint 3 was 0.9 works items/day (3.8 story points/day). Compared to Sprint 2, we had more work items, and each item was worth more story points on average.
- This sprint, we were more consistent than before in logging progress on Jira, but work can still be done on that side.

CHANGES:

- Improved story point estimation.
- Improved peer code review process.
