CSCC01 2025S
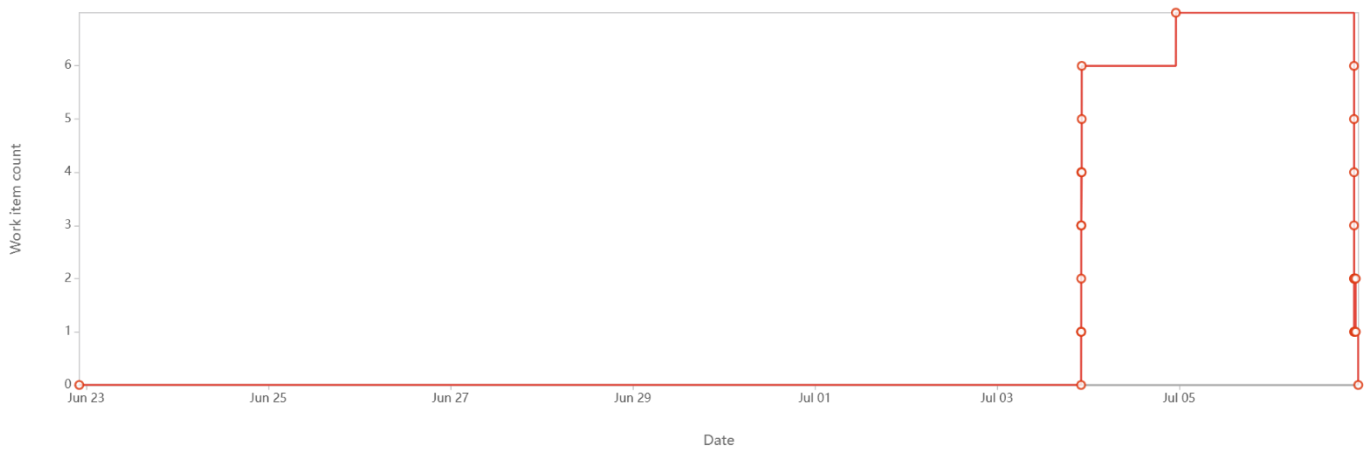

BURNDOWN REPORT

TEAM NAME – MICROSOFTIES

SPRINT VELOCITY VS PREVIOUS SPRINT:

- The sprint velocity for Sprint 2 was 0.5 works items/day (2.6 story points/day). Compared to Sprint 1, we had less work items, but each item was worth more story points.
- This sprint, we distributed the work more regularly instead of completing most tasks towards the end like last time. However, we did not consistently record progress in Jira, which is why the burndown chart appears flat for several days.

CHANGES:

- Adjusted story point estimation for better sprint planning.
